## AMAZON S3 UPLOAD FILE – ACTIVITY DESCRIPTION

Uploads a file to Amazon S3.

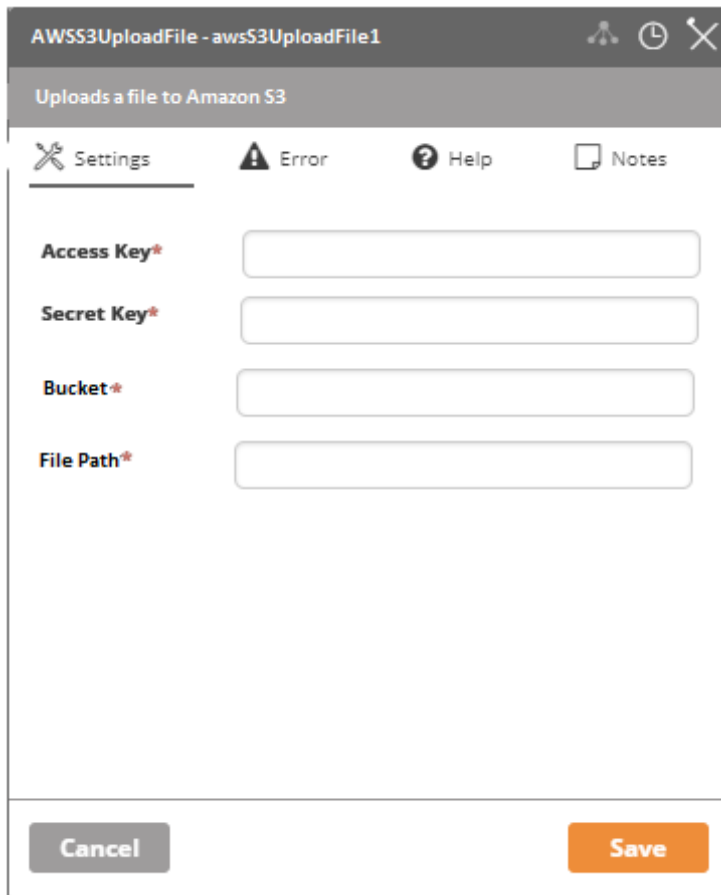

## AMAZON S3 UPLOAD FILE – OUTPUT

Success/Failure

## AMAZON S3 UPLOAD FILE – ASSUMPTIONS

1. This custom activity will be developed via Ayehu Activity Designer (see Activity Designer documentation).
2. This custom activity will be utilizing [Amazon S3 Rest API](#).

## AMAZON S3 UPLOAD FILE – SETTINGS

The image shows a settings dialog box titled "AWSS3UploadFile - awsS3UploadFile1". Below the title bar, it says "Uploads a file to Amazon S3". There are four tabs: "Settings" (selected), "Error", "Help", and "Notes". Under the "Settings" tab, there are four input fields, each with a red asterisk indicating it is required: "Access Key\*", "Secret Key\*", "Bucket\*", and "File Path\*". At the bottom of the dialog, there are two buttons: "Cancel" and "Save".

*Image not exact, see details below for more info*

1. Once the user clicks on the activity settings, the above page will be presented as a default.
2. The following fields are required and therefore should have a red \* character next to the label:
  - a. Access Key
  - b. Secrey Key
  - c. Bucket
  - d. File Path
